MATTHEW KING

Holland, MI | (616) 566-8213 | matthewbrking@gmail.com

EDUCATION

B.S. Computer Science ***Graduated December 2023***
Minor in Psychology *Grand Rapids, MI*
Grand Valley State University

LANGUAGES AND SKILLS

Proficient Languages: SQL, C#, JavaScript, React, CSS
Familiar Languages: C, Java, Swift, Python
Technologies: Git, Azure DevOps, Postman, Microsoft Fabric, PowerBI

WORK EXPERIENCE

Full-Stack Developer ***April 2023 - Present***
Challenge Manufacturing *Grand Rapids, MI*

- Developed and maintained over a half-dozen enterprise-grade internal web applications using React.js, helping to streamline operations and grow employee engagement across Challenge nationwide.
- Implemented and managed a Microsoft Fabric Data Lake and Power BI dashboards, making large amounts of important company data easier to access and understand.
- Collaborated in a small, agile team to handle the complete development process—from initial research through design, building, and optimizing our applications.

PROJECTS

Data Lake & BI Dashboards (Challenge MFG) ***July 2024 - Present***

- Built and maintained a large-scale Microsoft Fabric Data Lake using a medallion architecture, with scheduled pipelines, dataflows, and optimizations for high-volume ingestion and transformation.
- Translated and rebuilt business-critical stored procedures (1,000+ lines each) from T-SQL to Microsoft SQL.
- Developed interactive Power BI dashboards with drilldowns, DAX measures, and custom visuals.

Fleet Vehicle Management System (Challenge MFG) ***January 2024 - October 2024***

- Designed and built a full-stack system for reserving, carpooling, and managing company fleet vehicles that handles over 2,000 reservations annually.
- Engineered a secure, SQL-backed API and admin suite with server-side validation, role-based access, and Azure authentication to enforce policy rules and ensure data integrity.

Challenge Connect (Challenge MFG) ***April 2023 - Present***

- Co-developed Challenge Connect, a large-scale internal web platform with dynamic content, news, and employee resources used by over 3,000 employees across all U.S. locations.
- Built a full CMS suite integrated with hosted WordPress, enabling multiple departments to create and manage content.
- Developed a translation engine that caches and updates content from the CMS, improving accessibility and reach.

Python Raycasting ARENA ***March 2023***

- Developed a first-person Python raycasting engine, implementing ceiling rendering, multiple textures, and custom layouts.
- Implemented core game mechanics, sprite sorting, animation handling, collision detection, and enemy visibility logic.
